### Support Package

VWB offers you an incredible experience to take part in an international volunteer experience where you will expand your personal and professional skills while contributing to global development. VWB commits to supporting you throughout your volunteer journey and will cover the majority of the costs involved in being an overseas volunteer, including:

- Pre-departure training
- In-country orientation upon arrival in country of placement
- Return airfare to placement country
- Visa/permit costs
- The cost of required for vaccinations and anti-malarial medication
- Overseas emergency travel health insurance
- A monthly living allowance (MLA) that will be paid into the volunteer's bank account in Canada. The MLA is designed to be sufficient to cover simple housing, basic food requirements, and other typical monthly living expenses.
- Debrief after the placement

### **Fundraising**

VWB encourages each volunteer to raise funds towards the organization's operations.

### **About Veterinarians Without Borders**

In the global south, more than 90 per cent of food animals are raised by subsistence farmers yet these small-scale livestock producers, the majority of whom are women, have very limited access to quality and affordable animal health services. Aside from the risks associated with the loss of valuable livestock who provide important protein and/or income for poor households, zoonotic diseases that can be passed from animals to humans offer a very real threat to human health on a wider scale.

Veterinarians without Borders/Vétérinaires sans Frontières (VWB) works for, and with, communities in need to foster the health of animals, people and the environments that sustain us. VWB works nationally and internationally to train animal health workers, increase food security, and improve animal & public health. VWB provides overseas volunteer placements for veterinarians and other animal & public health professionals.

### **About the Project: Volunteers Engaged in Gender Responsive Technical Solutions (VETS)**

Volunteers Engaged in Gender Responsive Technical Solutions (VETS) is a seven-year (2020 to 2028) Volunteer Cooperation Program funded by Global Affairs Canada. VETS will engage 190 volunteers who will support local partner organizations in Ghana, Kenya, Lao PDR and Cambodia. Volunteers will help create integrated animal health systems to increase the livelihoods and household nutrition of small-scale farmers.

The VETS program utilizes the skills of volunteers to build local partner capacity to support community members, primarily women, to reduce poverty. Through improved production of livestock and crops, volunteers help improve family income and nutrition. The VETS program is built around the One Health concept, which recognizes that the health of people, animals, and the natural environment are interconnected. This project promotes the production of more and better food and increased incomes from livestock, all the while promoting land rehabilitation and conservation for sustainable development.
